

NA.YADRA Possible Night Stop Intelligence Report

Pacific Maritime Intelligence Platform

This report records a possible night-time offshore stop event for vessel ANTHAS near Denarau / Nadi Waters. The event is generated from the NA.YADRA behavioural maritime monitoring engine.

Event Summary

Field	Details
Vessel	ANTHAS
MMSI	253000026
Risk	HIGH
Behaviour Score	90
Detected Behaviours	OFFSHORE_LOW_SPEED_OR_STOPPED, NIGHT_OFFSHORE_STOP_INDICATOR, POSSIBLE_NIGHT_STOP_LOCATION
Fiji Time	2026-05-21 01:51:54 FJT
UTC Time	2026-05-20 13:51:54 UTC
Nearest Port	Denarau / Nadi Waters
Distance from Port	3.08 nautical miles
Speed	0.0 knots
Latitude	-17.722289999999997
Longitude	177.37288666666666

Analyst Explanation

This event shows ANTHAS detected slow or stationary outside a recognised port zone during Fiji night hours. Because the vessel was recorded at 0.0 knots and outside the Denarau / Nadi port radius, the system escalated the behaviour as a possible night-time offshore stop location.

The HIGH risk rating is based on multiple combined behaviours: low speed or stopped offshore, night-time stop indicator, possible night stop location, and stopped outside port zone. This should be reviewed by an analyst against vessel history, route pattern, ownership, port call information, and any supporting intelligence.

Important Note: This report is an intelligence lead for analyst review only. A detection does not confirm criminal activity.
