

# NA.YADRA Night Movement Intelligence Report

## *Pacific Maritime Intelligence Platform*

This report records a night movement detection for vessel ARROW near the Lautoka Port / Vuda Area. The event is generated from the NA.YADRA behavioural maritime monitoring engine.

### Event Summary

| Field              | Details                  |
|--------------------|--------------------------|
| Vessel             | ARROW                    |
| MMSI               | 319245300                |
| Risk               | LOW                      |
| Behaviour Score    | 20                       |
| Detected Behaviour | NIGHT_MOVEMENT           |
| Fiji Time          | 2026-05-21 01:51:54 FJT  |
| UTC Time           | 2026-05-20 13:51:54 UTC  |
| Nearest Port       | Lautoka Port / Vuda Area |
| Distance from Port | 6.75 nautical miles      |
| Latitude           | -17.64604166666667       |
| Longitude          | 177.32996                |

### Analyst Explanation

This event shows vessel ARROW detected during Fiji night-time movement outside the immediate Lautoka Port / Vuda Area. The LOW risk rating means the system has identified movement during night hours, but there is not enough supporting behaviour to classify it as suspicious by itself.

The coordinate listed above marks the vessel position at the time of detection. If the vessel later slows, stops, repeats this route, or operates near isolated areas or foreign vessels, the system can escalate the event into a higher-risk behavioural alert.

Important Note: This report is an intelligence lead for analyst review only. A detection does not confirm criminal activity.
